

TC006 Deductible Not Met Flow

Work Item ID: 1572

Description: Verify claim auto-pends to Deductible Review queue when deductible is not met

Precondition: Member is enrolled. OON deductible balance is \$1000.

Test Step: 1

Test Step Description: Submit out-of-network outpatient diagnostic claim for processing.

Test Step Expected Result: Claim is blocked from direct adjudication, status transitions to 'Auto-Pend', and the record routes to 'Deductible Review' queue.

TC009 Edge - Exact Deductible Balance

Work Item ID: 1572

Description: Verify allocation logic when claim amount exactly matches outstanding deductible

Precondition: Member OON deductible balance is exactly \$150.

Test Step: 1

Test Step Description: Submit claim matching deductible balance exactly.

Test Step Expected Result: System applies full \$150 to deductible; plan covers \$0, member responsibility is \$150, new deductible balance updates to \$0.

TC012 Negative - Missing Diagnostic Code

Work Item ID: 1572

Description: Verify validation layer flags claims missing mandatory diagnostic fields

Precondition: Member is active.

Test Step: 1

Test Step Description: Attempt to ingest claim without diagnosis descriptors.

Test Step Expected Result: Ingestion drops out with validation error alert mapping code 'ERR-VAL-99' (Missing Mandatory Diagnosis Data).

TC015 Deductible Partial Match

Work Item ID: 1572

Description: Verify partial deductible application when claim amount exceeds remaining deductible balance

Precondition: Member OON deductible balance is \$200.

Test Step: 1

Test Step Description: Process out-of-network claim through the adjudication engine.

Test Step Expected Result: System applies \$200 to satisfy remaining deductible, then subjects the remaining \$300 to standard 30% coinsurance (\$90 member responsibility).
