

TC013 Cancelled Status Handling

Work Item ID: 1571

Description: Verify display state and interactive check-in controls for cancelled time slots

Precondition: Appointment has been marked as Cancelled but originally scheduled time hour has not elapsed yet.

Test Step: 1

Test Step Description: Locate the cancelled schedule rows block item card container.

Test Step Expected Result: Portal displays the explicit status as Cancelled and blocks/disables UI interaction loops for online check-in operations.

TC016 Edge - Leap Year Handling

Work Item ID: 1571

Description: Verify schedule parser accurately handles edge leap dates without layout corruption

Precondition: Database scheduling ledger populated.

Test Step: 1

Test Step Description: View appointment card details inside the calendar rendering layout.

Test Step Expected Result: System displays the leap date 'February 29, 2028' cleanly without structural system calculations shifting dates forward to March.

TC019 No Appointments Layout

Work Item ID: 1571

Description: Verify standard text message visualization when patient has zero upcoming appointments

Precondition: Target profile is verified to have zero upcoming rows populated.

Test Step: 1

Test Step Description: Open the 'My Appointments' page directory link.

Test Step Expected Result: System gracefully displays flat textual context string reading exactly: 'You have no upcoming appointments.'

TC003 Negative - Inactive Enrollment

Work Item ID: 1572

Description: Verify claim is rejected if patient enrollment status is inactive

Precondition: Member enrollment status is terminated/inactive.

Test Step: 1

Test Step Description: Submit out-of-network outpatient diagnostic claim.

Test Step Expected Result: Adjudication engine immediately rejects claim with denial code 'ERR-ENR-01' (Inactive Enrollment).
