

TC001 Chronological Sorting

Work Item ID: 1571

Description: Verify upcoming appointments display ordered by date/time in ascending chronological order

Precondition: Patient user is logged in. Multiple scheduled active appointments populated.

Test Step: 1

Test Step Description: Navigate directly into the 'My Appointments' page grid dashboard view.

Test Step Expected Result: Portal interface correctly orders appointments chronologically ascending (earliest upcoming date maps first at top row position).

TC004 Accessibility - WCAG AA

Work Item ID: 1571

Description: Verify screen reader element tag descriptions on custom grid cards meet compliance standards

Precondition: Compliance criteria tracking operational.

Test Step: 1

Test Step Description: Inspect keyboard tab focus sequence traversals across the list elements components.

Test Step Expected Result: All interactive containers emit accurate ARIA accessibility labels matching standard WCAG AA specification perimeters cleanly.

TC007 Cancelled Expiry Visibility

Work Item ID: 1571

Description: Verify visibility lifecycle properties for cancelled appointments past their expiration

Precondition: Current mock test framework execution time maps to 2026-07-16 13:00.

Test Step: 1

Test Step Description: Trigger page view lookup refresh command parameters.

Test Step Expected Result: Cancelled appointments automatically stop rendering in upcoming list sections completely once their originally scheduled hour has passed.

TC010 Local Time Zone Conversion

Work Item ID: 1571

Description: Verify appointment times match user local target time zones automatically

Precondition: Server database time stamps persist tracking configurations natively in UTC.

Test Step: 1

Test Step Description: Evaluate display text fields for the specific appointment scheduling elements.

Test Step Expected Result: System automatically translates runtime timestamps into local parameters, rendering output value as 10:00 AM EST without backend data drift.
