

TC001 Local Time Zone Conversion (DUPLICATE of original TC010)

Work Item ID: 1571

Description: Verify appointment times match user local target time zones automatically

Precondition: Server database time stamps persist tracking configurations natively in UTC.

Test Step: 1

Test Step Description: Evaluate display text fields for the specific appointment scheduling elements.

Test Step Expected Result: System automatically translates runtime timestamps into local parameters, rendering output value as 10:00 AM EST without backend data drift.

TC002 Pagination Control — Concurrent Booking Attempt

Work Item ID: 1571

Description: Verify behavior of Pagination Control under standard network load conditions

Precondition: Database populated with active patient appointment records.

Test Step: 1

Test Step Description: Select the target option from 'My Appointments' view for Pagination Control

Test Step Expected Result: Correct data visual tags render cleanly without page overflow.

TC003 Pagination Control — Slow Network Retry

Work Item ID: 1571

Description: Verify behavior of Pagination Control under standard network load conditions

Precondition: Database populated with active patient appointment records.

Test Step: 1

Test Step Description: Select the target option from 'My Appointments' view for Pagination Control

Test Step Expected Result: Correct data visual tags render cleanly without page overflow.

TC004 Cancel Appointment Modal — Browser Back Button

Work Item ID: 1571

Description: Verify that Cancel Appointment Modal operates correctly when loaded by patient user

Precondition: Patient user logged in with valid session token.

Test Step: 1

Test Step Description: Navigate to the Patient Portal dashboard and trigger Cancel Appointment Modal

Test Step Expected Result: System successfully processes request and updates UI state within 2 seconds.

TC005 Appointment Reminder Toggle — Low Bandwidth Mode

Work Item ID: 1571

Description: Verify edge case data handling during Appointment Reminder Toggle execution

Precondition: User profile settings configured with default preferences.

Test Step: 1

Test Step Description: Submit the request form and observe screen update for Appointment Reminder Toggle

Test Step Expected Result: System logs action correctly and maintains complete session data integrity.
